Date:

TO: Chairman, Equipment Board

22 March 1963

FROM: *Chief, OC-E.*

SUBJECT: 6 March 1963 Equipment Board Agenda

Agenda Item No. 1: Procurement of 100 RR-48B (10 - 20 mcs) and 50 RR-48A (3.5 - 12 mcs) Receivers

R RR-48B Background: Almost all RR-D/11 receivers are committed to existing requirements and production models of the RR-49 receiver will probably not be available for another 12 months. Thus, no modern receiver is available for coverage above 12 mcs. To tide the Office over until the RR-49 becomes available, OC-OS recommends that 100 RR-48B receivers be procured at the laboratory. Cost of labor and parts for each receiver are estimated at \$125.00.

Required Action: Approve or disapprove the procurement of 100 RR-48B Receivers.

Member Action: Approve (*yes*) Disapprove ()

Member Comments: *I approve conditionally: the condition being an adjustment of price to show \$161.78 cost per unit. This figure is accurate and current.*

25X1A

RR-48A Background: Twenty-five RR-48 receivers have been produced by the OC Laboratory and 75 RR-48A receivers are now in production with delivery expected in March. In view of the shortage of tuneable receivers, OC-OS recommends that an additional 50 RR-48A receivers be produced by the OC Laboratory. Cost of labor and parts for each receiver are estimated at \$125.00.

Required Action: Approve or disapprove the procurement of 100 RR-48A Receivers.

Member Action: Approve (*yes.*) Disapprove ()

Member Comments: *Same Condition as above.*
